

STUDIO SETUP.

(FIRST LEVEL RECORDING STUDIO)

The 8 items needed to start the studio are;

- A computer; this should have a good sound and video card. Good processor and an adequate amount of RAM.
- DAW/Audio interface combo: Digital Audio Workstation is used in recording, editing and mixing. The combo is the hardware.
- Studio monitors
- Two microphones: ones which give clear and quality sound.
- Headphones
- Cables; XLR cables for the connection of the mics and 2 short ones for the monitor.
- Mic stand
- A pop filter
- Studio foam

Budget and estimation.

- Microphone + Pop filter = 500c
- Studio soundcard + computer speakers = 2500c
- Channel mixer = 1000c

With the above details, an estimate of 5000 cedis will be needed to set up the recording studio with a possibility of balance remaining. This excludes renting of building and the interior decoration of the studio.
